Professional Experience

Student Intern, Neumann Kaffee Gruppe.

01/2024 – 12/2024

Hamburg, Germany

- Organized and deployed docking stations for end users, ensuring compliance with organizational IT protocols and seamless device integration.
- Administered user accounts, access controls, and group policies in Active Directory and Microsoft 365 environments.
- Configured, tested, deployed, and troubleshooted desktops/laptops, including desktop printers, monitors, and docking stations, following all asset management processes and procedures.
- Automated silent installations, updates, and removals of enterprise applications using PowerShell script and Microsoft Intune, minimizing user disruption and ensuring up-to-date software compliance.

ERASMUS Intern, Jan Evangelista Purkyně University.

02/2023 – 07/2023

Ústí, Czech Republic

- Conducted field and pot experiments using Ryegrass and Miscanthus to evaluate soil carbon sequestration.
- Customized wireless LAN settings, including SSID broadcasting, maximum client limitations, and access point configurations to enhance network performance and limit unauthorized access.
- Monitored system performance and conducted troubleshooting to resolve technical issues.
- Maintained documentation of support issues, resolutions, and best practices to improve IT service quality.

IT Project Manager, KwamePrep International Consult

11/2017 – 09/2020

Abeokuta, Nigeria

- Acted as a team player supporting colleagues across the department, management, and leadership team to fulfil operational service levels, department initiatives, and project deliverables.
- Developed and maintained technical documentation for system configurations and troubleshooting.
- Supported line-of-business applications and resolved technical issues related to productivity tools and company-specific software.

Technical Support, Ogun State Ministry of Environment.

10/2016 – 10/2018

Abeokuta, Nigeria

- Designed and implemented network infrastructures by adding, naming, and connecting end-user devices (PCs, laptops, and switches) for seamless connectivity.
- Verified device IP assignments, enabled DHCP, and performed network troubleshooting using ipconfig and ping commands to ensure proper IP address allocation.

Education

Master of Science in Hydro Science and Engineering, Technical University Dresden.	10/2020 – 11/2024 Dresden, Germany
Bachelor of Technology in Meteorology, Federal University of Technology Akure.	02/2011 – 08/2016 Akure, Nigeria

Core Competencies

Programming Languages ● ● ● ● ● Python, R, Bash	Tools & Technologies ● ● ● ● ● Git, Grafana, PowerShell, Microsoft 365, Intune, Entra ID, Azure, Active Directory, Windows Server, VMware, Jira, ServiceNow
Project Management ● ● ● ● ● Global team collaboration, technical documentation, process optimization, and compliance monitoring	Operating Systems ● ● ● ● ● Linux/Ubuntu, Windows

Certifications & Trainings

Networking Professional, Oracle Cloud Infrastructure	08/2025
AI Foundations, Oracle Cloud Infrastructure	07/2025
Diploma in Cyber Security, Alison	04/2024

Languages

English — Fluent	German — Conversational

Projects

Deploying and Managing a Secure Application with Microsoft In	08/2025
This project demonstrates the deployment and management of a secure application environment using Microsoft Intune. It covers device enrollment, policy configuration, application deployment, and compliance monitoring across organizational devices.	
PowerShell Automation Script to Install, Uninstall, and Update Plugins for Notepad++	07/2025
This project contains PowerShell scripts for silently automating the installation, plugin setup, and uninstallation of Notepad++.	
CI/CD Pipeline with Jenkins, Maven, and AWS	02/2025
This project demonstrates the implementation of a complete, real-time DevOps CI/CD pipeline using Jenkins, Maven, and Tomcat, running on AWS EC2 instances. It covers the end-to-end setup of an automated pipeline for building and deploying Java applications with a focus on practical DevOps skills.
